

Challenge the new Challenges! In the supervision of professional certified trainers.

A Joint Program of
CISSP

(Certified Information Systems Security Professional)

CISSP is an independent information security certification governed by the International Information Systems Security Certification Consortium (commonly known as (ISC) ²). As of October 10, 2008, (ISC)² has reported certifying 59,963 information security professionals in 133 countries. In June, 2004, the CISSP program earned the ANSI ISO/IEC Standard 17024:2003 accreditation, the first IT certification to have done so.

It is formally approved by the U.S. Department of Defense (DoD) in both their Information Assurance Technical (IAT) and Managerial (IAM) categories. The CISSP has been adopted as a baseline for the U.S. National Security Agency's ISSEP program.

Why Become a CISSP?

- Certification gives you the backing, education, the networking system and the power to face these threats head on.
- Becoming a part of globally recognized family of information professionals.
- Increases your marketability.
- Provides greater opportunity for advancement.
- Builds respect and confidence.
